

GAC 1354 Professional Series

GAC-1354-WH7000

The Professional's #1 Choice in Whole Home Water Filtration.

The GAC-1354 Professional Series for Contractors is the standard in central water and is the professional's #1 choice in whole home water filtration.

The GAC-1354 provides the quality water filtration NWI is known for giving you great tasting water throughout your home and chlorine free water for your bathing, cooking and drinking

This unit is designed with a white plastic tank cover for contractor sales for use with an adaptable valve suitable for line sizes 3/4" to 1 1/2" and up to 35 gpm. MNPT 1", 1 1/4" and 1 1/2" adapters are included for easy install with flexible tubing and connections.

Made in the USA. Maintenance-free for 10 to 15 years before filter media replacement.

WHY IS THE NWI, GAC-1354-WH7000 SUPERIOR TO OTHER WHOLE HOUSE SYSTEMS?

NWI uses only high mesh medical grade granular activated carbon for superior filtration and longer carbon life. The Fleck high reliability 7000 series valve coupled with the easy flowing "Vortech™" media tank requires up to 30% less backwash water as compared with standard tanks using gravel underbeds.

WHO IS THIS UNIT FOR?

- Any home with a 3/4" to 1 1/2" water main service line.
- No real or perceived issues with water hardness.
- Continuous flow rates up to 35 gpm.
- City water or well water (comprehensive water test needed for well water)

WHAT ARE THE FEATURES & BENEFITS?

The Standard in Central Water: The GAC-1354 sets the standard in “whole house” filtration designed to filter all your water throughout your home.

Healthier Home & Lifestyle: NWI's GAC-1354 Series protects you and your family from chlorine and chemicals. Enjoy chlorine-free, healthy, filtered water for your entire home or facility – safe for all uses, including drinking, bathing/showering, pets, plants, pools, spas and plumbing . Safely removes chlorine and chemicals, resulting in healthier water for skin, hair and body.

Easy to Install & Use: Installs easily like a water heater at the main water supply line to your home. No need for any plumbing "loops" (these are used to prevent drinking taps, pools, and plants from using salt softened water). Maintenance-free for up to 10 years. Automatic backwash prevents bacterial build-up and provides a continuously renewed surface area for filtration (plus, the drain/backwash water is completely safe and can be used for plants and gardening). Maintains the flow rate and pressure you are used to. Complete installation information comes with every unit.

The Highest Quality Available: Sixty-five (65) pounds or 2.5 cu.ft. of medical high-grade granular activated carbon (GAC) filtration media removes chlorine, chloramines, pesticides, lead, THMs, and other volatile organic compounds (VOC's), creating a healthy environment and improving the taste, clarity and odor of all your water. In use worldwide by children's hospitals, medical centers, health and fitness centers, high-end hotels, and personal homes.

Environmentally-Friendly & Cost-Effective: NWI's GAC-1354 Series is the environmentally-friendly, maintenance-free choice to filter your water — no salts, no chemicals, no corrosive softeners, no brine discharge, no gimmicks . Replace expensive and wasteful bottled water with the healthy, filtered NWI water from every sink in your home. The tank and parts are recyclable and the filtration media is biodegradable. The advanced digital valve head requires an ordinary electric outlet and consumes only the power of a doorbell.

Protect Your Home & Appliances: NWI's GAC-1354 Series filtration protects all of your kitchen and bath products and appliances from the ravages of chlorine, chloramines, and volatile organic compounds (VOCs) which harm fixtures, finishes, surfaces, connections, internal parts – and you.
